You're a professional.

Don't let one amateur mistake put your life at risk.

Always think first when using ladders, working around wires or digging near underground cables or utilities.

Display this poster in your office, or anywhere you and your team can see it every day. And always call before you dig: **1-800-922-4455.**

Visit www.cl-p.com/community/safety to learn more.

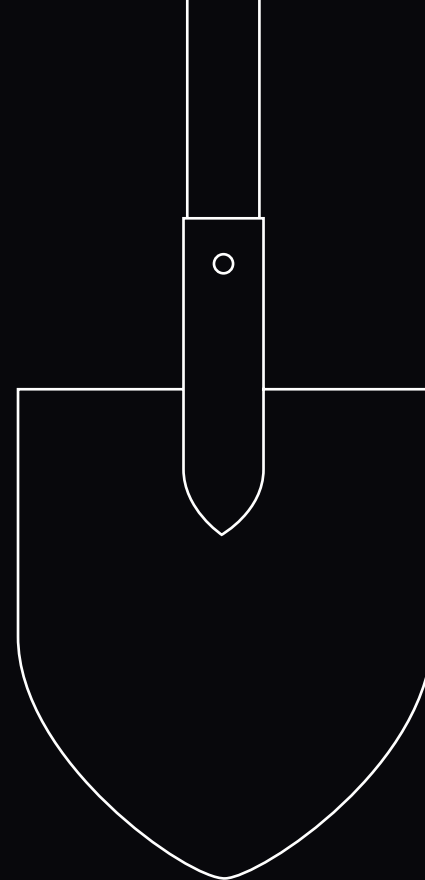

AN IMPORTANT MESSAGE FROM CL&P.

**WORKING ON
 THE JOB OR
 IN THE YARD,
 WHAT YOU
 DON'T SEE COULD
 HURT YOU.**

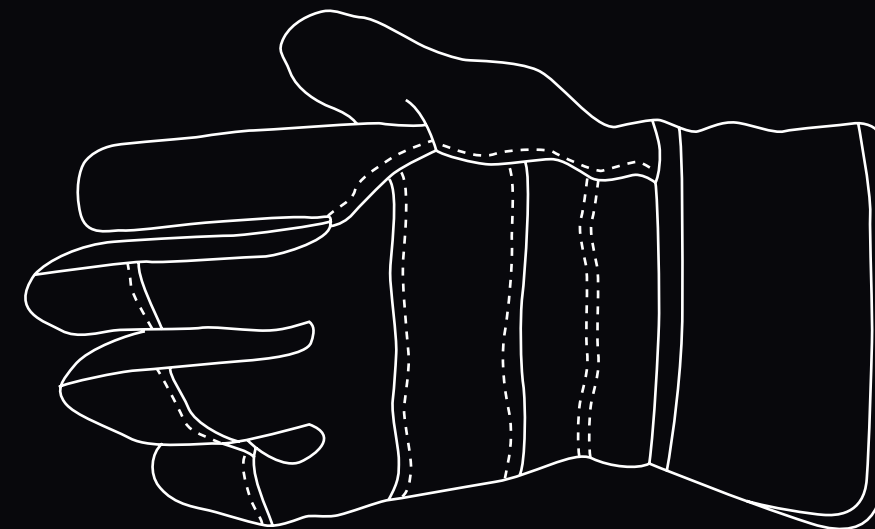

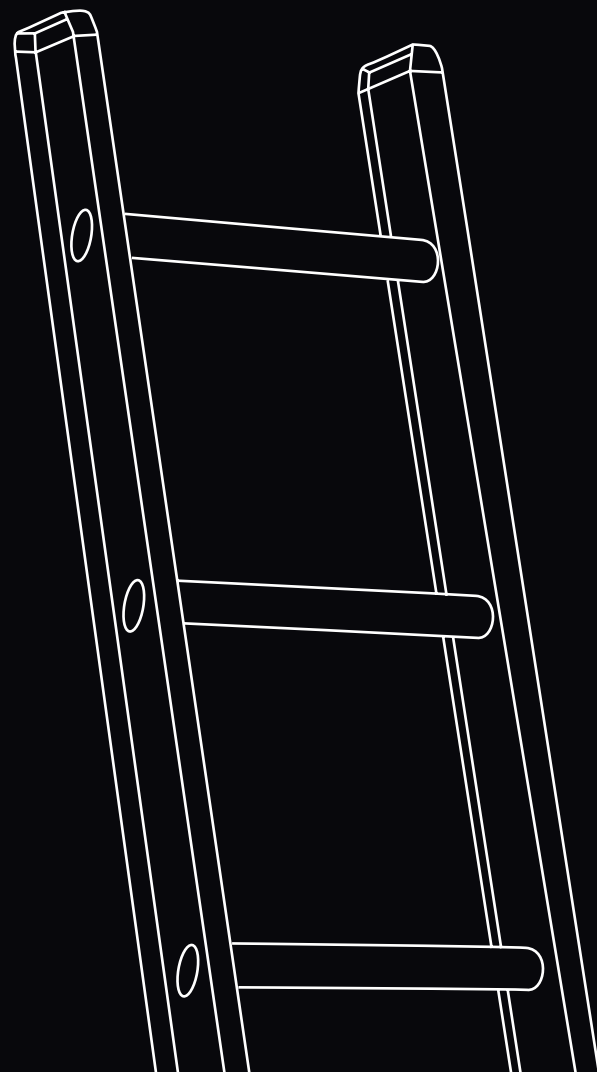

DON'T

DIG 'EM

REACH 'EM

TOUCH 'EM

ON THE JOB OR IN THE YARD, BE CAREFUL AROUND POWER LINES.
Call before you dig: 1-800-922-4455. Or visit www.cl-p.com/community/safety to learn more.

**Look out for power lines,
and never underestimate the
power of electricity.**

As you know, safety is important on every job and at every job site.

For those of us at CL&P, electrical safety when performing work around power lines is a matter we take very seriously.

That's why we've sent this new poster, to encourage you to review safety procedures with your team. Although many professionals feel they are familiar with electrical hazards, it never hurts to re-focus on the potential dangers and how to avoid them.

Remember, never underestimate the power of electricity. Always look out for power lines, and be sure to call before you dig. To learn more, visit our Web site at www.cl-p.com/community/safety.

Thank you for promoting on-the-job electrical safety.

Sincerely,
Ray Necci
President & Chief Operating Officer
