----------------	-----------

COMBINED PUBLIC BENEFITS CHARGE:

Pursuant to Conn. Agencies Regs. § 16-245-1(a)(2)(A) the Systems Benefits Charge, the Conservation Charge, and the Renewable Energy Charge are combined for billing purposes into the Combined Public Benefits Charge effective January 31, 2006.

RATE ADJUSTMENTS: This rate will be adjusted as provided in the Company's Energy and Transmission Adjustment Clauses.

COMPETITIVE TRANSITION ASSESSMENT COST ADJUSTMENT:

Competitive Transition Assessment (CTA) charges and terms under this rate includes a CTA Cost Adjustment Charge set in accordance with the Company's CTA Cost Adjustment.

SYSTEMS BENEFITS COST ADJUSTMENT:

Systems Benefits service charges for all customers taking service under this rate shall be set in accordance with the Company's Systems Benefits Cost Adjustment.

SERVICE AND SUPPLY OF FACILITIES:

All street lights shall be operated continually each and every night from approximately one-half hour after sunset until one-half hour before sunrise. All poles, lamps, brackets, luminaires and related equipment shall be furnished and maintained by the Company. All energy and normal renewal of lamps shall be furnished and controlled by the Company at its expense. Broken, cracked and damaged lamps and other equipment shall be replaced by the Company at the customer's expense.

The Company shall supply street lights whenever requested by the customer, including the poles, lamps, brackets, luminaires and related equipment therefore. All such poles, lamps,

brackets, luminaires and related equipment shall be of a modern type approved for normal use by the Company. The Company shall bear the full cost of such lights except that the additional cost of underground distribution facilities required to supply street lighting service shall be paid by the customer.

Conversions from incandescent or mercury vapor to high pressure sodium lights will be scheduled according to the resources of the Company. Priority for conversions will be given to those customers who have agreed to an overall conversion plan.

If at the request of the customer a luminaire is removed prior to being installed for at least fourteen (14) years, the customer upon removal of the luminaire will be billed an amount representative of the original installed cost less the depreciated cost and less the salvage value of the luminaire and related equipment.

If a municipality elects to purchase the Company's streetlighting equipment prior to being installed for at least fourteen (14) years, the purchase price shall equal the original installed cost of the existing equipment less the depreciation together with any unrecovered cost of facilities replaced by the existing equipment, and the municipality will thereafter be billed on Rate 117.

FAILURE OF LAMPS TO LIGHT:

The Company will replace inoperative lamps within three working days after written notification by the customer. No credit will be allowed for periods during which lamps are out of service. Written notification shall be deemed sufficient if it includes the exact location of the light. Exact location includes either the street and pole number or the street number in front of which the light is located.

MUNICIPALITY PURCHASE OPTION:

A Municipality may purchase street lighting equipment over a period not to exceed five years. If the Municipality elects to phase-in the purchase of the Company's street lights over multiple years, the Municipality must purchase all street lights billed to the Municipality's account(s) within five years from the date of the first purchase. All purchase phases shall consist of contiguous geographic sections as described in Rate 117. Partial Street Lighting Service Rate 117 is the applicable Rate for street lighting equipment owned by a Municipality.
