GENERAL:

This Tariff may be revised, amended, supplemented or supplanted in whole or in part from time to time according to the procedures provided in M.D.P.U. regulations and Massachusetts law. In case of conflict between this Tariff and any orders or regulations of the M.D.P.U., said orders or regulations shall govern.

DEFINITIONS:

“Competitive Supplier” shall mean any entity licensed by the M.D.P.U. to sell electricity to retail customers in Massachusetts, with the following exceptions: (1) a Distribution Company providing Default Service to its distribution customers, and (2) a municipal light department that is acting as a Distribution Company.

“Customer” shall mean any person, partnership, corporation, or any other entity, whether public or private, who obtains Distribution Service at a Customer Delivery Point and who is a customer of record of the Company.

“Customer Delivery Point” shall mean the Company’s meter or a point designated by the Company located on the Customer’s premises.

“Default Service” shall mean the service provided by the Distribution Company to a customer who is not receiving Generation Service from a Competitive Supplier in accordance with the provisions set forth in the Company’s Default Service Tariff, on file with the M.D.P.U.

“Distribution Company” or “Company” shall mean an electric company organized under the laws of Massachusetts that provides Distribution Service in Massachusetts.

“Distribution Service” shall mean the delivery of electricity to Customers by the Distribution Company.

“Generation Service” shall mean the sale of electricity, including ancillary services such as the provisions of reserves, to a Customer by a Competitive Supplier.

“M.D.P.U.” shall mean the Massachusetts Department of Public Utilities.

“Retail Access Date” shall mean March 1, 1998 unless otherwise determined by the M.D.P.U.

AVAILABILITY:

Default Service shall be available to any customer who, for any reason, has stopped receiving Generation Service from a Competitive Supplier.

BILLING:

Each customer receiving Default Service shall receive one bill from the Company, reflecting unbundled charges for their electric service.

INITIATION OF DEFAULT SERVICE:

Default Service may be initiated in any of the following manners:

- A. A customer who is receiving Generation Service from a Competitive Supplier notifies the Distribution Company that he wishes to terminate such service and receive Default Service. In this instance, Default Service shall be initiated within two (2) business days of such notification for residential customers. For other customers, Default Service shall be initiated concurrent with the customer's next scheduled meter read date, in accordance with the Company's Terms and Conditions for Competitive Suppliers. If the customer provides such notification fewer than two (2) days before the customer's next scheduled meter read date, Default Service shall be initiated with the customer's subsequent scheduled meter read date.
- B. A Competitive Supplier notifies the Distribution Company that it shall terminate Generation Service to a customer. In this instance, Default Service shall be initiated for the customer concurrent with the customer's next scheduled meter read date, provided that the notice of termination of Generation Service is received by the Company two (2) or more business days before the next scheduled meter read date, in accordance with the Company's Terms and Conditions for Competitive Suppliers. If the notice of termination is received fewer than two (2) days before the customer's next scheduled meter read date, Default Service shall be initiated concurrent with the customers' subsequent scheduled meter read date.
- C. A Competitive Supplier ceases to provide Generation Service to a customer, without notification to the Distribution Company. In this instance, Default Service to the customer shall be initiated immediately upon the cessation of Generation Service.
- D. A customer taking Standard Offer Service has not chosen affirmatively a Competitive Supplier at the end of the term of Standard Offer Service.

Page 3 of 6

TERMINATION OF DEFAULT SERVICE:

Default Service may be terminated by a customer concurrent with the customer's next scheduled meter read date provided that notice of initiation of Generation Service by a Competitive Supplier is received by the Company two (2) or more business days before the next scheduled meter read date, in accordance with the Company's Terms and Conditions for Competitive Suppliers.

If the notice of initiation of Generation Service by the Competitive Supplier is received by the Company fewer than two days before the customer's subsequent scheduled meter read date, Default Service shall be terminated concurrent with the customer's subsequent scheduled meter read date.

There shall be no fee for terminating Default Service.

DEFAULT SERVICE PRICING OPTIONS:

**Fixed Price Option** allows default service customers to pay a fixed price that remains level for six-month periods for Residential Rates, Small C&I Rates and Street Lighting Rates; and, three-month periods for Medium and Large C&I Rates. This option is available to those customers receiving default service on the date that each default service term begins and to those customers that move into WMECO's service territory after the beginning of each default service term.

DEFAULT SERVICE FIXED PRICE OPTION TRUEUP:

Customers taking default service under the fixed price option who switch to a competitive supplier during a default service term will have their bills prior to the switch recalculated using the monthly prices that were in effect during each month that the customer received default service. This provision does not apply to customers that move out of WMECO's service territory.

DEFAULT SERVICE INITIAL PRICE SELECTION:

Residential customers on WMECO Distribution Rates R-1, R-2, R-3, R-4 and small commercial and industrial (Small C&I) customers on WMECO Distribution Rates 23, 24, G-0, and T-0 will automatically be placed on the six-month fixed price option, unless the customer elects the variable price option.

Medium and large C&I customers on WMECO Distribution Rates G-2, T-4, T-2, PR, Contracts, and street lighting customers on WMECO Distribution Rates S-1 and S-2 will automatically be placed on the variable price option, unless the customer selects the three-month fixed price option.

DEFAULT SERVICE PRICE SWITCHING OPTIONS:

Residential and small C&I customers have the opportunity to switch from the fixed price option to the variable price option, but once the switch is made, the customer may not return to the fixed price option as long as the customer continues to receive uninterrupted default service.

If a residential or small C&I customer leaves default service to take generation service from a competitive supplier and subsequently returns to default service, the customer automatically returns to the fixed price option and again has the opportunity to switch from the fixed price option to the variable price option.

Medium and large C&I and street lighting customers have the opportunity to switch from the variable price option to the fixed price option, but once the switch is made, the customer may not return to the variable price option as long as the customer continues to receive uninterrupted default service.

If a medium or large C&I or street lighting customer leaves default service to take generation service from a competitive supplier and subsequently returns to default service, the customer automatically returns to the variable price option and again has the opportunity to switch from the variable price option to the fixed price option.

DEFAULT SERVICE COST ADJUSTMENT:

The prices in all the rates of the Company are subject to adjustment to reflect the power purchase costs incurred by the Company in arranging Default Service that are not recovered through the Default Service Rate.

On an annual basis, the Company shall reconcile its total cost of purchased power for Default Service supply against its total Default Service revenue, and the excess or deficiency shall be refunded to, or collected from, all Distribution Company customers on a per kilowatt-hour basis over the following 12 months, with interest, through a Default Service Cost Adjustment Factor. As of January 1, 2007 the uncollectible component related to the provision of this service will be derived by multiplying the estimated Default Service revenue for the 12-month calendar period by 0.926 percent. Subsequently, the estimated uncollectible amounts collected each calendar year will be reconciled on an annual basis to 0.926 percent of actual Default Service revenues for the same 12-month calendar period. For purposes of the above reconciliation, total purchased power revenues shall mean all revenues collected from customers through the Default Service rate for the applicable 12-month reconciliation period together with payments or credits from suppliers, including uncollected prior period balances in the Default Adjustment account.

DEFAULT SERVICE COST ADJUSTMENT FACTOR:

Charge per kWh	-\$0.00079
----------------	------------

The calculation of the Default Service Cost Adjustment Factor shall be subject to the review and approval of the Department.

TERMS:

The Company's Terms and Conditions for Distribution Service and Terms and Conditions for Competitive Suppliers in effect from time to time, where not inconsistent with any specific provisions hereof, are a part of this rate schedule.
